## ABOUT ME

Front-End Developer with 2 year of experience in building responsive and user-friendly websites using HTML, CSS, JavaScript, and WordPress. Skilled in customizing WooCommerce stores and Envato HTML templates. Recently created a Netflix clone using React.js, Firebase, and APIs. Passionate about developing clean, modern web applications with good performance and design.

---

## SKILLS

- Frontend: HTML5, CSS3, JavaScript, React.js
  - CMS: WordPress, WooCommerce
  - Version Control: Git, GitHub
  - Basic proficiency in Adobe Illustrator
- 

## PROFESSIONAL EXPERIENCE

### God Studio - Front-End Developer

December 2023 - Present

- Designed and developed responsive websites using HTML, CSS, and JavaScript.
- Customized WooCommerce-based eCommerce websites and integrated payment gateways.
- Converted Envato HTML templates into client-ready blog websites with custom enquiry forms.
- Collaborated with the team to deliver SEO-optimized and mobile-friendly web solutions.
- **Custom HTML Blog Sites (2 Projects):** Fully customized Envato HTML templates based client specifications, adding custom enquiry forms and optimizing for fast loading.
- **WooCommerce E-Commerce Sites(4 Projects):** Developed functional online stores using WooCommerce, integrated payment gateways, and ensured responsive design and SEO best practices.

## Projects

**Netflix Clone** | React.js, Firebase, TMDB API Built a responsive Netflix-style streaming UI to practice React, API integration, and authentication.
